## Dioxygen and reactive oxygen species' paramagnetic properties are important factors in dermatology

Published On: December 15, 2022 | Pages: 016 - 023

Author(s): BF Minaev\*

Dioxygen (the O<sub>2</sub> molecule) is an important component of all tissues including skin. Even small fluctuations of O<sub>2</sub> amount (dioxygen concentration changes in the tissue microenvironment) can strongly affect the signaling functions of cells through the reactive oxygen species (ROSs) activity and hence - the whole cellular metabolism, the cell proliferation, and different ...

Case Report

## A rare case report of piloleiomyomas

Published On: March 30, 2022 | Pages: 005 - 006

Author(s): Amar Uttamrao Surjushe\*, Anand Saraswat, Vaishali Atram and Neha Mundada

Leiomyoma is a rare benign tumor of smooth muscle. In the word leiomyomas, “Leio” means “smooth”, “myo” means ‘muscle’, and “oma” means ‘tumor’. It may arise from smooth muscles of the skin, uterus, bladder, urethra. Depending upon the origin of skin smooth muscles cutaneous leiomyomas are of three main types: 1. Piloleiomyoma or leiomyoma cutis or pilar leiomyoma der ...

### Short Communication

## Clinical features of Rheumatoid Purpura in adults

Published On: March 17, 2022 | Pages: 001 - 004

Author(s): El Arabi Yasmina\*, Hali F, Marnissi F and Chiheb S

Introduction: Rheumatoid purpura is a systemic vasculitis of small vessels that is more common in children than in adults. The aim of our study was to revise the characteristics of rheumatoid purpura in adults. Methods: We conducted a retrospective descriptive and analytical study [June 2016 - June 2021], including all the patients hospitalized in the dermatology dep ...

### Opinion

## Androgen receptor, oxidative stress and inflammation at the crossroads of skin diseases

Published On: July 26, 2022 | Pages: 012 - 015

Author(s): Yiumo Michael Chan\*, Yen-ting Liu and Hardy W Chan

Skin is the largest organ of the human body and acts as a protective barrier as our first line of defense. The development of effective treatments for skin diseases represents one of the biggest challenges in drug discovery. The pathogenesis of many skin disorders is complex and multifactorial. ...
