## **Ocular Safety of Intravitreal Injections of Age-Related Macular Degeneration Treatments in a Prospective Observational Cohort Study in Europe**

Published On: March 23, 2015 | Pages: 036 - 040

Author(s): Kui Huang\*, Marla B. Sultan, Duo Zhou, Charles S. Tressler and Jingping Mo

Purpose: Estimate the incidence of pertinent ocular adverse events (POAEs) related to intravitreal (IVT) injections for age-related macular degeneration (AMD) treatments in Europe. Methods: Ophthalmologists prospectively followed patients, who received IVT injection treatment for AMD including Macugen®, Lucentis®, and Avastin® at ophthalmic clinical centers in Europe, ...

## **A Rare Case of Benign Intracranial Hypertension with Bilateral Complete Visual Loss and Sixth Nerve Paresis**

Published On: March 23, 2015 | Pages: 033 - 035

Author(s): Chandana Chakraborti\*, Nabanita Barua, Sheuli Kumar and Rosy Chishti

Introduction: Benign intracranial hypertension (BIH) is a disorder defined by symptoms and signs suggestive of increased intracranial pressure (ICP) in the absence of any cause evident on neuro-imaging or other evaluations. Usually the disease has a variable outcome but chances of severe visual loss are only 6%. ...

### Goldenhar Syndrome

Published On: April 11, 2015 | Pages: 041 - 044

Author(s): Claudia Florida Costea\*, Cristina Rusu, Camelia Geanina Ivanescu, Silvia Dumitras, Gabriela Dimitriu, Andrei Cucu, Mircea Albert, Dana Mihaela Turluc and Ingrith Crenguta Miron

Goldenhar syndrome (Oculo-Auriculo-Vertebral Spectrum) (OAVS) is a rare congenital condition characterized by craniofacial abnormalities associated with anomalies of the spine, heart, kidney, central nervous and gastrointestinal system. Craniofacial abnormalities include the incomplete development of the eye, ear, nose, soft palate, lips and jaw.

We report a case of G ...

### Bilateral Numerous Warts in Upper and Lower Eyelids, in Middle-Aged Man

Published On: March 18, 2015 | Pages: 031 - 032

Author(s): Mohammad Hossein Davari\* and Hoda Gheytsi

Background: Warts are small, usually painless growths on the skin caused by a virus called human papillomavirus (HPV). Most, but not all, are generally harmless [1,2]. Warts can be disfiguring and embarrassing. Sometimes they itch or hurt (particularly on the feet). Some warts spread through sex. But in The eyelids are rare. Viral warts are a common skin condition, w ...
