The hypoxia index covers roles of all decelerations and will reduce cerebral palsy

Published On: March 13, 2018 | Pages: 005 - 005

Author(s): Kazuo Maeda*

It was strange that fetal outcome was vigorous in 3 late decelerations, but ominous when it repeated. It was thought that FHR decelerations expresses hypoxia, because the heart rate was fully parallel to rabbit PaO₂, if it is below 50mmHg, and human fetal PaO₂ is 50mmHg or less. ...
