Multimodality imaging based treatment volume definition for recurrent Rhabdomyosarcomas of the head and neck region: An original article

Published On: May 04, 2022 | Pages: 013 - 018

Author(s): Ferrat Dincoglan*, Omer Sager, Selcuk Demiral and Murat Beyzadeoglu

Objective: Rhabdomyosarcomas are among the malignant soft tissue tumors which may originate from primitive mesenchymal cells. These tumors may also be located in the head and neck region and may behave locally aggressive with the invasion of nearby structures. Radiation therapy (RT) may play a role as part of initial management as adjunctive therapy, or for treatment ...

Anesthetic management of patients with carcinoid syndrome and carcinoid heart disease: A systematic review

Published On: August 24, 2022 | Pages: 019 - 029

Author(s): José Luis Iglesias-González, María Rocío López-Iglesias, José M Rodríguez-López*, Agustín Díaz-Alvarez, Felipe Gómez-Caminero López, Alberto Ríos-Llorente, Francisco Santiago Lozano-Sánchez and María Pilar Sánchez-Conde

Background (purpose): Surgery on patients with Carcinoid Syndrome (CS) and Carcinoid Heart Disease (CHD) is a challenge for anesthesiologists due to the high risk of developing Carcinoid Crisis (CC). The purpose of the study is to assess whether or not the use of octreotide as prophylaxis in the perioperative environment would decrease the incidence of CC (PEAK METHOD ...
